6.55-6.65	6.8																	L137				

**How to use this chart**  
 The numbers prefixed by the letter "L" such as L57 in the chart indicates the bushing number. The number serves as a refill number for various assortments. To select the correct bushing, first measure the pivot, & find it size in the range of sizes shown in column Z. By reading across, you will find the various bushing that will fit the size pivot. Select the thickness of bushing by referring to letter "H" & the correct diameter by the letter "D". After choosing the bushing, read up the column to line "RN" which indicates the size reamer to be used for the selected bushing. Reamers are identified by Roman numerals.
